

Abdelrahman Hamdy

Senior Mobile Developer (Android | Flutter | KMP)

abdellrhman.hamdi@gmail.com | +20 109 544 9725 | Cairo, Egypt (Open to Relocation) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Mobile Developer with 6 years of experience building scalable Android, Flutter, and Kotlin Multiplatform (KMP) applications for enterprise and government organizations across Saudi Arabia, UAE, and Egypt. Skilled in designing maintainable mobile architectures, leading feature development, and delivering production-ready solutions with a strong focus on performance, code quality, testing, and user experience. Passionate about building scalable software, improving engineering practices, and delivering exceptional user experiences.

TECHNICAL SKILLS

Mobile Development:	Native Android Development, Flutter, Kotlin Multiplatform (KMP), Compose Multiplatform
Architecture & Design:	Clean Architecture, Multi-module Architecture, MVI, MVVM, SOLID Principles, Offline-First Architecture
Languages:	Kotlin, Java, Dart, C, C++, SQL, Python
UI Development:	Jetpack Compose, Material Design, XML, Data Binding, Responsive Interfaces, Multi-tenancy
Concurrency & State Management:	Kotlin Coroutines, Flow, RxJava, BLoC, Hilt, Koin
Networking & Serialization:	Retrofit, Ktor (Client & Server), REST APIs, WebSockets, Kotlinx Serialization, AI APIs (OpenAI)
Local & Remote Data:	Room, SQLDelight, SQLite, WorkManager, Datastore, Firebase (Auth, Firestore, FCM, Crashlytics, Remote Config)
Testing & Quality:	Unit Testing, End-to-End (E2E) Testing, Screenshot Testing
Build & Development Tools:	Gradle (Kotlin/Groovy DSL), Convention Plugins (build-logic), Version Catalogs, Custom Plugins, Git/GitHub, Android Studio, ADB
Deployment & Google Services:	Google Play Console, Firebase App Distribution, Google Maps, Location Services

WORK EXPERIENCE

- Senior Mobile Developer (Android | Flutter | KMP)** Jan 2023 – Present
Pulse by Solutions (formerly Giza Systems, a Solutions by STC company) Cairo, Egypt & Riyadh, KSA | Full-time, Hybrid
 - Riyadh Parking — Remat Al-Riyadh:** Engineered the official smart parking platform for Riyadh, regulating 24,000+ paid commercial and 140,000+ residential parking spaces across the capital as part of Saudi Arabia's Vision 2030 initiative.
Tech Stack: MVI, Multi-module, Jetpack Compose, Multi-tenancy, Hilt, Coroutines, Flow, Retrofit, Unit/UI/E2E Testing
 - MODON — Saudi Authority for Industrial Cities:** Developed the official mobile platform for the Saudi industrial cities authority, enabling investors to manage services across 35+ industrial cities and technology zones nationwide.
Tech Stack: MVVM, Clean Architecture, Hilt, Coroutines, Flow, Retrofit
 - FahimBot:** Built an AI-powered chatbot using Flutter and OpenAI API, delivering intelligent conversational experiences.
Tech Stack: Flutter, Dart, BLoC, OpenAI API
 - Served as Release Lead for production rollout, driving sprint deliveries, conducting rigorous code reviews, and mentoring mobile developers.
- Senior Android Developer** Sep 2023 – Mar 2024
Emirate Arabian Horse Society (EAHS) Cairo, Egypt | Part-time, Remote
 - Architected and published the official EAHS Android app on Google Play, enabling real-time horse auction bidding, pedigree lookup, and digital registration for breeders across the UAE.
Tech Stack: MVVM, Hilt, Coroutines, Flow, Retrofit
 - App Link:** [Google Play Store](#)
- Android Software Engineer** Jan 2021 – Jan 2023
Electric Power Systems Engineering Co. (EPS) Cairo, Egypt | Full-time, On-site
 - Delivered 3 enterprise Android applications deployed across all 9 state electricity distribution companies in Egypt, collectively serving a national grid of 40+ million subscribers — covering billing collection, meter reading, and power theft enforcement.
 - Engineered an offline-first POS billing app with auto-sync and conflict resolution, achieving 99.9% data reliability across low-connectivity regions.
Tech Stack: MVVM, Hilt, Coroutines, Flow, Retrofit, Kotlin Serialization, Room, Datastore, Data Binding
 - Collaborated cross-functionally with QA, product, design, and support teams throughout the full development lifecycle.
 - Led employee training sessions for electricity company field teams on application rollout and usage.

FEATURED PROJECTS

ServicePlatform (Service Marketplace)

[GitHub Repository](#)

- Full-stack, cross-platform service marketplace connecting clients with service providers, with a shared codebase running across Android, iOS, and Web.

Tech Stack: KMP, Compose Multiplatform, Koin, Ktor (Client/Server), SQLDelight, PostgreSQL, Exposed ORM

Automotive APK Manager

[GitHub Repository](#)

- All-in-one maintenance and app injection utility for Android-based car screens, utilizing OEM firmware update exploits without requiring root access.

Tech Stack: Python, ADB, APK Patching (Orientation/Auto-Start), Safety Filters, Android Emulator Testing

Shop Cart (E-Commerce Platform)

[GitHub Repository](#)

- Full-featured e-commerce platform consisting of separate Client and Admin applications with product management, dashboard analytics, and payment checkout.

Tech Stack: MVVM, Hilt, Coroutines, LiveData, Paging, Data Binding, Navigation, Firebase (Auth/Firestore/Storage)

Mutone (Music Player)

[GitHub Repository](#)

- Feature-rich media player featuring background playback services, audio focus management, and custom push notifications.

Tech Stack: MVVM, Hilt, Coroutines, MediaPlayer, Audio Focus, Firebase Cloud Messaging, Navigation

Zahran (Family Tree App)

[GitHub Repository](#)

- Interactive family tree visualizer backed by a pre-populated SQLite database, background sync managers, and static broadcast receivers.

Tech Stack: MVVM, Data Binding, LiveData, Room, WorkManager, Static Broadcast Receivers, BoomMenu

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Electronics & Communications

2014 – 2019

Faculty of Engineering, Zagazig University

Grade: Good

- Graduation Project:** "Smart Security System" (Grade: Excellent, 99.5%) – Served as Team Leader to design and build an IoT-based property security system integrated with mobile controls.

Android Nanodegree Program

2020

Google & Udacity

Verify Certificate

HONORS & ACTIVITIES

- Award Winner — Huawei Developer Day Egypt CodeLab (2019):** Won a technical coding challenge in a competitive mobile application development session.
- Contestant — IEEE Robotics and Automation Society (2018):** Designed and developed an automated "Laser Alarm" hardware-software prototype for the regional competition.
- Graduate — TIEC Innovation & Entrepreneurship Program (2017):** Completed intensive capacity building in product ideation and business model design, including the Intel Ideation Workshop.
- Graduate — ITIDA Professional Development Program (2018):** Certified in advanced communication, public presentation, teamwork, and leadership skills.
